

January 13, 2022

Dear Neighbor,

We are writing to notify you that Kerr McGee Oil & Gas Onshore, LP, a subsidiary of Oxy USA Inc., will soon begin the next phase of developing oil and natural gas wells within 2,000 feet of your home or property. We are committed to being good neighbors by providing frequent and transparent information, safeguarding the environment, and protecting the health and safety of the communities we live and work in.

Work activity, location, and schedule

Enclosed, you will find information about the phases of energy development and well locations. Please visit our website [OxyColoradoStakeholder.com](https://oxycoloradostakeholder.com) for more information on oil and natural gas development. Below is a summary of the planned work and the estimated schedule.

Phase	Work activity	Estimated start	Estimated end
1 - 3	Construction, casing, and drilling	Completed	
4	Well completions	Late February 2022	Late April 2022
5	Facility construction	Mid-March 2022	Early May 2022
6	Reclamation	Early June 2023	Early July 2023

[For up-to-date information on timing, please visit oxycoloradostakeholder.com/project-updates](https://oxycoloradostakeholder.com/project-updates)

Standard practices and mitigation strategies

Our standard practices align with the guidelines of the Colorado Oil and Gas Conservation Commission (COGCC) and the Colorado Department of Public Health and Environment. In addition, we carefully planned the development and mitigation techniques for this location to ensure the temporary impacts are minimized as much as possible. Mitigations during development include a robust traffic management plan, installation of sound walls, and continuous sound and air monitoring.

To access the most up-to-date information on current projects, please visit the Project Updates tab at oxycoloradostakeholder.com/project-updates.

Sincerely,

Oxy Stakeholder Relations

Hours: Monday - Friday, 7 a.m. - 4 p.m.

Phone: 866.248.9577

Email: ColoradoStakeholder@oxy.com

After-Hours and Emergency Line: 970.515.1500

AREA OF OPERATION

SBJ 22-13HZ

Location: 5102 CR 46 - Parcel # 106113000032

Cross streets: South of County Road 46 and East of Dry Creek Road
Unincorporated Weld County

Legal: W1/2 SECTION 13 TOWNSHIP 4 NORTH, RANGE 68 WEST, 6TH P.M

Well description: SBJ 22-13HZ, 13 wells

Weld County Permit#: 1041WOGLA20-0010;

COGCC Permit ID: Location ID 479198

Weld County Oil and Gas Energy Department:

1301 N. 17th Avenue, Greeley, CO Telephone: 970.400.3580

Colorado Oil and Gas Conservation Commission: cogcc.state.co.us – 303.894.2100

Phases of Energy Development

For more information, please see www.OxyColoradoStakeholder.com/Oil-and-Gas-101

1 Pad Construction 30-45 days per pad

Standard construction equipment prepares the well site. A wall may be installed to reduce or minimize noise and light during development.

2 Surface Casing Set 1-2 days per well

A drilling rig begins the underground construction process by installing steel pipe and cement (surface casing) to protect groundwater. Surface casing is set at least 50' below the aquifer, which is typically about 1,000' below the surface.

3 Horizontal Drilling 4-6 days per well

A production rig arrives and drills to a depth of 7,000 to 8,000 feet. The horizontal portion of the wellbore can extend more than two miles.

Additional layers of protective steel casing and cement are installed.

4 Well Completions: 3 Components 6-9 days per well

Hydraulic Fracturing: a safe, highly engineered technology developed in the 1940s. Fracturing fluid is pumped under high pressure down the wellbore to create hairline fractures in the rocks over a mile below the earth's surface.

Flowback: After fracturing, the wells are opened and oil and gas flows into the mobile production facility.

Well clean-out and Tubing: We clean-out the wells to remove excess sand and install the production tubing.

5 Production Facility Construction 30-45 days per facility

Production facilities are constructed adjacent to the wells to collect and separate the oil, natural gas and water that are produced. Facility production is 30-45 days of work done in stages over a period of about four months.

6 Reclaim Well Site 30 days per pad

Once development phases are complete, the pad is reclaimed to the largest extent possible to match the existing landscape. Each well will produce energy vital to the health and welfare of our communities or decades to come.
